**OBJECTIVE** I'm looking forward to studying and working in the real world as Web developer like Frontend. I have worked extensively on Frontend development and spent time learning ReactJs. However, I've studied and grasped the fundamentals of Backend and I'm keen on exploring FullStack Developer.

**EDUCATION** *The University of Danang - University of Science and Technology*, Electronics and telecommunication, Computer Engineering, 2018 - 2023.

**TECHNOLOGY SKILLS** **Engineering**  
*Programming Languages:* Javascript, Python.  
*Database Management Systems:* MongoDB.  
*Frameworks:* ReactJs, FastAPI, ExpressJs.  
*Other:* Docker, Sonarqube.

**General**  
*Language Skill:* Basic-level English.

**PROJECTS** ***DreamTravel*** is a website for connecting, sharing, and booking travel tours with each other. The website is built using ReactJS and NodeJS (Express), in conjunction with the MongoDB database.

*Responsibility*

- Handle Sign up and Log in with Auth, JWT, Bcrypt.
- Create Booking with Calendar.
- Build searching any properties by keyword.
- Design web styles with SCSS and Material UI, create responsive design compatible with all devices.
- Create new Tour with details information and show this in pages.
- Upload, delete photos from local to MongoDB database by converting base64.
- Build Redux state management.

*Technology*

- ReactJs, NodeJs, Express, MongoDB, Redux, SCSS, Material UI.
